EXPERIENCE

20spokes
Software Developer
Jan. 2018 - Present

- Build web and mobile software products for various clients using Rails, React, React Native, JavaScript, Postgres, Heroku, CircleCI, and AWS.
- Maintain and debug past projects in addition to developing greenfield apps.
- Heavy emphasis on cross-platform development and responsive design.

Apprentice
Oct. 2017 - Jan. 2018

- Learned best practices in software development while building applications in React.js, React Native, Rails, Elixir and Phoenix.

Dev Bootcamp
Teaching Assistant/Mentor
Aug. - Oct. 2017
Helped students learn new programming concepts and tech stacks through the socratic method and pair programming.

Association of Legal Administrators
Copywriter/Editor
Feb. 2015 - May 2017
Wrote and designed HTML/CSS emails and email templates and produced microsites for association events in house CMS and style.

From publishing to marketing to web development, my career has been a journey of considering great ideas from authors, teams, and peers and helping them come to life. I'm motivated by inclusive, high-energy teams that foster curiosity and growth.
